

Audio Content Detection | Optical Character Recognition(OCR) | Keyword Detection | Speech to Text | Logo Detection

ABOUT

In essence, Equinox's AI-enhanced engine automates large-scale monitoring, precisely identifies audio-graphics markers, and delivers deep insights-with minimal manual oversight. It's the future of intelligent media monitoring and compliance in an increasingly complex broadcast ecosystem.

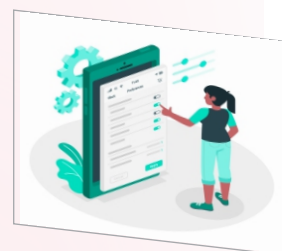

- Allow search on all content
- Facility to mark portions of captured video, or import external clips to be searched
- User selectable criteria allows flexible searches
- Extremely fast search engine, gives result within seconds
- Customizable report with facility export
- Search Video on Channel/Brand Logo, Graphics Popup or OTT Content

AUDIO CONTENT DETECTION

Optical Character Recognition (OCR)

- Automatically convert on-screen text from graphics to editable text
- Live text conversion and display
- Multiple regions can be defined for one frame for simultaneous conversion
- Supports over 120 languages
- Automatic Sentiment Analysis

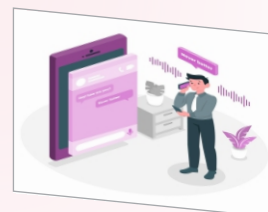

- Find non-standard spoken words from the content, like names and proper-nouns
- User can add their own custom words and train the model locally
- Can search multiple keywords and detect multiple occurrences

KEYWORD DETECTION

SPEECH TO TEXT

- Transcribe live content to editable text
- User can also transcribe any section of past recordings
- Supports most languages and dialects
- Automatic Sentiment Analysis
- Translation

- Detects Logos or any sub-image in the media frame
- Useful in detecting visual brands while being aired
- User trainable model allows user to add their own logos to detect

LOGO DETECTION
